EXECUTIVE SUMMARY

Data Enthusiast with hands-on experience in business intelligence, ETL pipelines, reporting automation, data analytics, and machine learning. Experienced in transforming complex business data into structured reports, dashboard-ready datasets, and analytical solutions for operational and management reporting. Strong focus on connecting technical implementation with business reporting needs through data processing, automation, dashboard development, and stakeholder collaboration.

WORK EXPERIENCE

Data Scientist June 2025 – Present

PT. Tiga Daya Digital – Jakarta, Indonesia

- Developed BI dashboards and reporting solutions for client and internal projects using Tableau, FineBI (FanRuan), and Metabase.
- Built and maintained data pipelines, ETL scripts, and reporting automation workflows using Python, SQL, and DDL.
- Processed, transformed, and standardized complex business data from multiple sources to support reporting and dashboard development.
- Designed automated reporting workflows to reduce manual data preparation and ensure consistent, dashboard-ready outputs.
- Collaborated with clients and internal teams to gather requirements, validate outputs, resolve data issues, prepare documentation, and deliver requested revisions.

Data Scientist April 2025 – June 2025

PT. Delman Data Teknologi – Jakarta, Indonesia

- Responsible for processing and analyzing large-scale industry data, delivering actionable insights for clients.
- Collaborated with cross-functional teams to identify and resolve data-related challenges
- Implement automation and ETL processes to streamline data workflows and ensure efficient data handling.
- Developed and maintained data pipelines to support real-time and batch data processing.
- Contributed to building scalable solutions for data integration and transformation using tools such as DDL, Python and SQL.

Data Science Intern February 2024 – June 2024

PT. Hadji Kalla – Makassar, Indonesia

- Implemented predictive maintenance strategies using machine learning algorithms to analyze historical data and identify patterns indicative of optimal battery replacement times in GR vehicles, and perform advanced analysis for other sparepart.
- Successfully completed the asphalt price forecasting project using LSTM by incorporating additional features and variables such as oil price data to predict argus price. Developed a sales data trend forecasting model to guide argus purchases, utilizing annual sales data from PT. Bumi Sarana Utama, which is a subsidiary of the Kalla Group. Delivered outputs in the form of interactive dashboards for user-friendly insights using Power BI.
- Developed dashboards and APIs using tools like Power BI, Streamlit, and Flask for model deployment and for further modeling requirements in both projects.
- Carrying out projects using analysis, forecasting, and machine learning approaches

- Applied an analytical and business-oriented approach to problem-solving, considering factors such as the opinions of fellow interns, stakeholders, and mentor guidance.

Computer Lab Assistant

September 2023 – August 2024

Universitas Lampung – Bandar Lampung, Indonesia

- Taught 4 practicum courses (algorithms and programming, data structures, rpl and operating systems) to students in semester 1 and 3.
- Provide direct guidance and instruction to students during lab sessions, as well as ensuring understanding of course material and fostering a learning environment.
- Evaluated and assessed student performance during practicum activities, offering constructive feedback to enhance learning outcomes.
- Responsible for recapping practicum assessment data from practitioners.

EDUCATION

University of Lampung – Bandar Lampung, Indonesia

August 2021 – July 2025

Bachelors of Informatics Engineering

Cumulative GPA: 3.84/4.00

Relevant Courework: Algorithms, Database, Machine Learning, Deep Learning, & Programming

SMAN 15 Bandar Lampung – Bandar Lampung, Indonesia

July 2018 – April 2021

High School of Science Major

Student Representative in City Level Chemistry Olympiad

Ranked in the top 5 in school, in grades 11 and 12

CERTIFICATION

- | | |
|--|---------------|
| • Database Design, ORACLE Academy | October 2022 |
| • Database Programming with SQL, ORACLE Academy | December 2022 |
| • IoT Fundamentals: Connecing Things, Cisco Networking Academy | November 2023 |
| • Belajar Machine Learning untuk Pemula, Dicoding Indonesia | October 2023 |
| • SQL (Advanced), HackerRank | April 2024 |
| • Memulai Pemrograman Dengan Python, Dicoding Indonesia | August 2023 |
| • Belajar Dasar Visualisasi Data, Dicoding Indonesia | August 2023 |

SKILLS

Language: English & Indonesian

Soft Skill: Teamwork, Critical Thinking, Logic, Adaptive, Creative, Communication, Initiative

Hard Skill: C++, Java, Python, Data Analytics, Business Understanding, Matplotlib, Numpy, Machine Learning, Deep Learning, Computer Vision, NLP, Tensorflow, Apache Airflow, Apache Hadoop, Apache Spark, Apache Kafka, Statsmodels, Pyspark, Scikit-learn, HTML, CSS, Javascript, SQL, MySQL, Oracle, PostgreSQL, NoSQL, MongoDB, Data Visualization, Streamlit, Git, Github, ETL, Docker, Streamlit, Flask, AWS, AWS Sagemaker, Microsoft Office, Microsoft Power BI, Tableau, Metabase, Fine BI, Figma, Apache Airflow, Pentaho Spoon, and Microsoft SQL Server, Delman Data Teknologi (DDL)
